

RADIOLOGY OPPORTUNITY

KAMLOOPS, BRITISH COLUMBIA

Excellent opportunity for an Interventional Radiologist seeking a broad-scope practice to join our collaborative and growing team at Royal Inland Hospital.

Royal Inland Hospital is a Tertiary Care and Trauma Centre providing services in x-ray, fluoroscopy, ultrasound (GE), CT (Siemens Dual Source Flash x2), recently upgraded MRI (1.5T GE), digital mammography, nuclear medicine, bone densitometry and vascular/non vascular interventional.

Responsibilities include Diagnostic and Interventional Radiology coverage. Our current vascular practice is broad including peripheral vascular interventions, fibroid embolization, fistula management and an assortment of inpatient embolizations. Development of an oncology program is in progress. Candidates with experience or an interest in program development would be an asset.

After hours tele-radiology support allows for excellent work-life balance with plenty of time to take in the abundance of extracurricular activities in the beautiful Okanagan!

Permanent and locum opportunities are available.
